

How can Power Exchange & Market Operator help monitoring

Peter Nemček, M.Sc.

**Southeast Europe Electricity Market Monitoring Workshop
Roundtable Discussion on Who Performs the Monitoring Function
October 4-5, 2005**

Borzen - Slovenian PX and MO

MARKET OPERATOR

Notification of
bilateral contracts

Base operating
schedule
processing

Imbalances
settlement

Transmission rights
market – explicit auctions

Ancillary services market

Balancing market

POWER EXCHANGE

Day ahead
power
market

Wood
biomass
market

CLEARING HOUSE

Clearing and settlement

Which information can Borzen as MO provide to the regulatory body?

■ Pure data:

- Market structure – relation between balance groups and subgroups
- Scheduled and realized flow of electricity
- Calculation of imbalances (financial and quantitative)
- List of participants in different auctions
- Results of explicit capacity auctions
- Results of ancillary services auctions

■ Different analyses

Which information can Borzen as **PX** provide for the regulatory body?

■ **Pure data:**

- List of participants
- Volumes
- Prices

■ **Analyses:**

- Trading
- Anomalies

Open issues on regional level

■ **Market operator**

- Is regional MO feasible?
- Who should monitor?

■ **Auction Office**

- Who should monitor?

■ **Power Exchange**

- Which PX is really regional?
- Who should monitor?

THANK YOU FOR YOUR ATTENTION !
